DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 17-21 are, drawn to a sleeve, classified in class 299, subclass 104.
 - II. Claims 6-9, 12-16, 22-24 are, drawn to a ~~rotatable tool holder~~ *arm*, classified in class 299, subclass 106.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it is evidenced by claims 9, 15 and 22-24 that a split sleeve is not required for patentability. The subcombination has separate utility such as a hole protector. *as shown in fig 1*
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
